Office Action Summary

Art Unit: 1761

1. Claims 9 and 10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Applicant's traversal has been considered but is not convincing for the reasons set forth in paragraph nos. 3 and 4, Paper No. 4.

2. Claims 1 and 4 are objected to because of the following informalities: In claim 1, "obtainable" should be changed to "obtained". In claim 4, "retains stably" should be changed to "stably retains". Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Okada et al (5,892,026; col. 3, lines 15-20; col. 6, line 1 to col. 7, line 5 and Ex. 8-14).

Okada et al discloses a food material, as claimed by applicant, which has been heated and dehydrated in concentrated aqueous trehalose solution including mixing, soaking or coating the food material with said solution.

The percent and temperature limitations in claim 7 are method limitations which do not patentably distinguish applicant's food product from the product prepared in Okada et al. However, any differences that may exist between applicant's product and the product of Okada et al are deemed to be obvious.

6. Claims 1-15 and 7 are also rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Roser (5,026,566, col. 2, lines 15-28). Roser discloses a proteinaceous foodstuff which has been dehydrated and heated in a concentrated aqueous trehalose solution. Partially pre-dehydrating (claim 2) is a method limitation which does not patentably distinguish applicant's final product^t from that of Roser. Also, see the last two sentences in paragraph no. 5 above.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arthur Corbin whose telephone number is 703-308-3850. The examiner can normally be reached on Tuesday-Friday from 10 am to 7:30 pm. The examiner can also be reached on alternate Mondays.
